### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-43, drawn to a Meta Model for building a knowledge-oriented software application, comprising 5 separate and distinct models, classified in class 717, subclass 104.
  - II. Claims 44-60, drawn to a Meta Knowledge Model, classified in class 717, subclass 104.
  - III. Claims 61-79, drawn to a Meta Logic Model, classified in class 717, subclass 104.
  - IV. Claims 80-118, drawn to a Kernel of a Run-time Model, classified in class 717, subclass 104.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the independent claims of Invention I are directed to a model comprising 5 separate and distinct models, and do not require the specifics of the individual model as recited in the independent claim of Invention II.

Art Unit: 2124

3. Inventions I and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the independent claims of Invention I are directed to a model comprising 5 separate and distinct models, and do not require the specifics of the individual model as recited in the independent claim of Invention III.

4. Inventions I and IV are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the independent claims of Invention I are directed to a model comprising 5 separate and distinct models, and do not require the specifics of the individual model as recited in the independent claim of Invention IV.

5. Inventions II, III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. Each respective invention has utility as a model not requiring the specifics of the other models. See MPEP § 806.05(d).

*Telephone Restriction Practice*

Art Unit: 2124

6. MPEP § 812.01 states the Examiner does not have to telephone the attorney or agent of record in cases where the Restriction is deemed complex. The Examiner deems the Restriction/Election complex and the attorney or agent of record should be afforded the benefit of receiving the action for careful review.
